<p>Right now, some people around the world are sick with a virus called COVID19.</p>	 sick
<p>The virus can pass from person to person through tiny droplets that come from a person's mouth or nose when they cough or sneeze.</p>	 cough or sneeze
<p>I can help prevent catching and spreading the virus by staying home and not visiting with people who I do not live with.</p>	 stay home
<p>People may catch and spread the virus at gatherings. School is a gathering, so I need to stay home from school for now. I will go back to school when doctors and scientists say that it is safe.</p>	 doctors and scientists
<p>While I am home, I can still do some of my favorite things from school. I can tell people I live with about things I like to do.</p>	 art reading
<p>I can make a schedule at home like my schedule at school.</p>	 schedule
<p>It's ok to miss my friends and teachers; I can still talk to them on the phone or a video call.</p>	 phone call
