Right now, some people around the world are sick. That’s because they have a virus.

I do not notice the virus because it is very small, but people with microscopes have seen the virus and they named it COVID19.

If I catch the virus, I may feel sick. If I feel sick, it’s important to tell somebody I don’t feel well.

If I am sick, I may have a cough or it might feel difficult to breath.

If I am sick, my throat might hurt or I might have a runny nose.

If I am sick, I may feel warm. I may have a fever. If I am sick, I may not be able to smell or taste.

I can cover my mouth when I cough or sneeze, this will help prevent spreading germs. I will wash my hands every time I return home and before I eat.

If I am sick, I may need to wear a mask to prevent spreading germs.
