

When Can I Go Back to School?

Social Story

WWW.AUTISM.ORG

Right now, some people around the world are sick with a virus called COVID19.

The virus can pass from person to person through tiny droplets that come from a person's mouth or nose when they cough or sneeze.

**I can help prevent catching
and spreading the virus by
staying home and not
visiting with people who I
do not live with.**

People may catch and spread the virus at gatherings. School is a gathering, so I need to stay home from school for now. I will go back to school when doctors and scientists say that it is safe.

**While I am home, I can still
do some of my favorite
things from school.**

**I can tell people I live with
about things I like to do.**

**I can make a schedule
at home like my
schedule at school.**

**It's ok to miss my friends
and teachers; I can still
talk to them on the phone
or a video call.**
